HIGH VISIBILITY

THE NAME OF EXCELLENCE

About Us:

Manwell Industry is a reliable manufacturers and supplier of Sports Gear, Sports Wear, Fitness Wear, Garments, Summer Wear, Leather Collections, Work Wear.

OUR MISSION STATEMENT:

We want to create a product that is more than just a logo on a piece of Apparels. We want it to be meaningful and worn with pride which is actually useful on and off the fitness ground.

THE MANWELL GUARANTEE:

Here at Manwell Industry, we pride ourselves on our cutting edge designs using the latest textile material. This constant innovation ensures that all of our products, and the people wearing them, achieve their maximum potential, and give their best performance.

Majestic Jacket Systems

Changing weather conditions require versatile protective clothing that is adaptable to the elements and remains comfortable to workers. As conditions can sometimes rapidly shift throughout the day, it is critical to choose the proper safety apparel that can accommodate weather changes while maintaining the safety and comfort workers need. This will support a safe work environment, steady productivity, and company compliance policies.

Majestic's high visibility jacket systems provide ANSI 107-2010 Class 3 and Class 2 compliant components that will accommodate changing weather conditions. From a full jacket ensemble with a fleece or soft shell liner, to a Class 2 fleece vest, our high visibility jacket systems will keep you visible and comfortable against the worst conditions.

PROTECTIVE CLOTHING

8 different configurations

1. Full jacket ensemble— jacket & liner
2. Full jacket & fleece vest
3. Full jacket without liner
4. Vest jacket without liner— ANSI Class 2
5. Vest jacket & entire fleece liner
6. Vest jacket & vest fleece liner— ANSI Class 2
7. Full fleece liner
8. Fleece vest liner—ANSI Class 2

MI-1622 / MI-1623 / MI-1624

The Transformer, 8-in-1 bomber. Offers eight varieties of wearing options, which include the basic fully lined Class 3 waterproof jacket, Class 2 vest, a high visibility Class 3 liner, and five more options that can be created depending on the days weather. The jacket features a detachable hood, ID holder pocket, radio tab straps, a fleece collar, six pockets and many other features which make the Transformer the best high visibility jacket on the market. Meets ANSI / ISEA 107- 2010 Class 3 standard. **M-6X, LT-4T**. Liner also sold separately, see below item MI-1622 Yellow, MI-1623 Orange.

MI-1622 Yellow. **M-6X, LT-4T**

Majestic Layering Versatility

The Maxx-On parka and Transformer jacket listed in this section provide you with multiple layering option.

Below, you will find three of them. The 75-1371 soft shell jacket provides a tailored professional look whether worn inside or out. The 75-5381/75-5382 high viz fleece liner (sold with the Transformer and separately) has multiple wearing options, with its zip off sleeves. The 75-5081 black fleece liner gives you an option to zip out and wear it separately, even off the jobsite.

Majestic keeps you warm and stylish, all year round!

High visibility yellow parka with waterproof breathable oxford fabric and concealed adjustable hood. Elastic wrist with Velcro closure, stitched and taped seams, harness D ring pass through with storm strap, vented mesh back, zipper storm flap with heavy duty snaps, and side zippers for added comfort and pocket accessibility. Outer pockets with storm flaps, side slash insulated pockets, inside pocket, and mic tabs on each chest. Ability to zip in separate Class 3 fleece liner. Meets ANSI / ISEA 107-2010 Class 3 standard. **For more lining options see below. M-6X, LT-4T**

MI-1699R High visibility yellow brim hat with sidesnaps and drawstring chinstrap. Regular size.

MI-1699S Small size.

Breaking down the different classes

In order to receive a rating of a class 2 or class 3 safety apparel, it must achieve preset requirements set by the American National Standards Institute, or ANSI. These requirements include the amount of necessary reflective material, the amount of background material, and whether or not the garment has sleeves.

Safety classifications were designed to help regulate the required apparel needed by state workers. ANSI clothing is necessary in areas of high speed traffic and when workers are near heavy machinery. If you are purchasing one for yourself personally, there is no law requiring you to wear a certain class. It is always a good idea, however, to consider purchasing one with a rating of class 2 or class 3, as it will provide more visibility than one with an economy rating.

Class 2—This reflective clothing is required for workers who are near heavy machinery or near traffic between the speeds of 25-50 mph. ANSI designates that all class 2 garments must have 201 square inches of retro-reflective material, with 1.375 inch reflective striping. They must also have 775 square inches of background material and are sleeveless.

Class 3—This reflective clothing gives the user higher visibility than that of class 2. They have sleeves, 310 square inches of reflective material with 2 inch striping, and 1240 square inches of background material. Those rated Class 3 are required for workers near traffic in excess of 50 mph.

Class E—This reflective clothing includes high visibility pants and bib overalls. When Class E garments are added to Class 2 or 3 garments, the ensemble is considered Class 3. It is not intended that Class E clothing is to be worn without or to replace Class 2 or 3 apparel.

Economy Class Vests—Some companies use the term economy to denote a vest as cheap or inexpensive, while some others use the term to describe one that does not meet the ANSI requirements of Class 2 or 3. It is important to check the description for clarification.

Site Safety Apparel

Site safety apparel does not meet the rigorous standards of ANSI for visibility. What site safety apparel is designed to do is to provide comfort and wear ability while still providing higher degrees of visibility than normal clothing. Areas where site safety apparel can be used: construction sights, recycling plants and areas where there is plant traffic, but not at higher speeds. Talk with your onsite safety professional to see if site safety apparel is right for your application.

Majestic has introduced a full line of site safety in different weights and make up of fabric. Please read on to find just the right garment for you.

Another way Majestic makes things easy for you, is personalization. All of these garments can be personalized with striping and logos. Read more about personalization in the later pages of this catalog or please contact your Majestic sales representative to find out more.

Be safe, be seen!
 Although there is no standard for high visibility hand apparel, that doesn't mean we don't care. The gloves on these pages all in some way use materials that are ANSI 107 compliant, for visibility. We care about you and we care about your hands. Simply put, if your hands are more visible, this makes you safer and makes you more visible to others.

ANSI 107
 Made with ANSI 107 (High Visibility Standard) approved materials.

MI-1750

Cold weather 15 gauge high visibility nylon outer liner. Insulated brushed 10 gauge acrylic liner with foam nitrile palm dip coating. **XS-XXL**

MI-1785 High visibility orange. **XS-XXL**

Why ARMOR SKIN™?

ARMOR SKIN™ was developed to keep the worker comfortable and safe. Leather goods are a commodity, and as such are subject to wild fluctuations in the market. With hide shortages worldwide, we at Majestic were driven with the task of finding “something else” out there. With ARMOR SKIN™, we found it!

ARMOR SKIN™ is the one of the toughest materials on the market—a true synthetic that can provide unmatched abrasion resistance. It is literally stronger than leather. We have measured this by taking samples of material and placing them on our in-house abrasion test machine. The results speak for themselves—we were able to develop a material that provides better abrasion resistance than cowhide and pigskin, and with

a far superior fit and feel factor.

ARMOR SKIN™—More wear and abrasion resistant than leather and pound for pound the toughest synthetic glove material available.

Style options include slip-on or with a Velcro wrist strap. The black style is available unlined or with your choice of three levels of cold protection. Great fit, feel and comfort.

All styles come tagged. Available in sizes XS-XXL
